## Handling Freight in Various Quantities, Sizes, Weights, and Types

We can handle all types of freight including small packages (by air, LCL), heavyweight/high capacity goods, and plants.

## Cross-Border Transportation Services

We offer various cross-border transportation choices to enable departures from Japan and various other places in order to deliver freight to designated places.

# Transport Routes Available

# Air Transportation

## Global Air Freight

We specialize in delivering freight to Russia and CIS nations, but also deliver to a variety of locations around the world, in close cooperation with our strategic group of global partners, in order to best serve our valued customers.

## A Variety of Services

We are engaged not only in air transportation between airports, but also in a variety of services including collection, packaging, storage, shipping and customs clearance.

## Door to door

We can deliver your freight from door to door.

# Ocean Transportation

## Extensive Route Coverage

We are engaged in ocean transportation along various European, North American, and Asian routes, in close cooperation with numerous ocean freight companies.

## A Variety of Freighters

We are ready and able to deliver your freight by cargo ships and other types of freighters including conventional ships, auto-transport ships, and charters, in close cooperation with numerous ocean freight companies, in order to serve our valued customers in the most satisfactory manner.

## Proposing the Best Route

We offer various route options to choose from to reach the same destination. For example, you can choose a route via the Russian Far East, Iran, Baltic states, or Europe.

## On-Time Status Report

We have local contacts in all seaports on every route to inform our valued customers of an ever-changing local status in a timely manner.

# Inland Transportation (by Rail)

## Extensive Route Coverage

We are engaged in inland transportation to deliver your freight from the nearest port to Russia and its neighboring countries by train. We offer various route options via the Russian Far East, Finland, Saint Petersburg, Iran, the Black Sea, and China en route to Central Asia.

## Smooth Loading onto Train Cars

Our office in Nakhodka, Russia, offers professional services and ensures smooth loading of your freight onto train cars once forwarding proceedings are all completed.

## Tracking Report

We send daily tracking reports to our valued customers so they can locate the current position of their freight on a daily basis.

## Distribution Channels with Chinese/Mongolia Railway System

We have distribution channels with the Chinese and railway system, and Russian counterpart, in order to deliver your freight inland to Russia via China and to countries in Central Asia.

# Inland Transportation (by Truck)

## Swift and Smooth Customs Clearance

We swiftly clear customs to transit or import your freight once it has arrived at the port of discharge or airport, load it onto a cargo truck, and deliver it to the consignee safely.

## Handling Freight in Various Sizes

We provide heavy haul trucking for all types of oversize/overweight freight which is too big or heavy to fit into a train car.

## Choosing Your Desired Destination

We can deliver your freight to the consignee designated point of unloading such as truck terminals or the grounds of the factory (a bonded area) owned by the consignee.

# Business Partners

## A Strategic Group of Global Partners

Our major business partners are based in the following locations:

Russia - Nakhodka, Vladivostok, Yuzhno-Sakhalinsk, Vanio, Khabarovsk, Irkutsk, Ekaterinburg, Moscow, and Saint Petersburg
